

Empowering young women in  
Science, Technology, Engineering and Maths.

## THE PARTNERSHIP

The organizations came together in a small-scale partnership in VET to empower young women in STEM. Targeting girls aged 11-14, the project seeks to spark their interest and confidence in STEM through exposure to female role models and engaging educational workshops. It addresses the underrepresentation of women in STEM, aiming to foster diversity and innovation.

## CURRENT AWARENESS SURVEY

In order to understand the young women`s perception, interest and awareness of the STEM fields a survey was created specifically for the target group, translated and delivered to 10 participants per partner. Based on the results the partnership adapted the rest of activities within the project.

## DIGITAL STORIES

The initiative includes digital stories of women in STEM. Each partner interviewed 3 women in STEM regarding their journey, their passion for their field and how they manage being a woman in STEM. This action will show the young women real like examples.
